SERVICE BULLETIN – 01/AUGUST 2004

SPR 120-165

NEW LOCATION OF THE ICE LEVEL CONTROL

Starting from the following Serial Numbers:

SPR 120 s/n 0051

SPR 165 s/n 2103

As done on SPR 80 Model now also on SPR 120 and SPR 165 Models the Optical Ice Level Control has been moved from the upper side of the plastic ice spout into the storage bin, just above the outlet of the plastic ice spout (see photos below).

This modification increased the capacity of the storage bins by 7-8 kgs.
