NEW OPTICAL ICE LEVEL CONTROL BRACKET KIT

As written on the previous Service Bulletin 01/March 2004, the Optical Ice Level Control has been moved/relocated in a different place inside the storage bin so to increase the level of the stored ice by 5-6 kgs.

Now, a new RETROFIT KIT is available in order to modify, if need, the machines in the field.

The new Optical Ice Level Control Bracket Retrofit Kit is available under **Part Number 060616 00** and it consists of parts shown on the bottom photo.

The metal bracket must be secured to the upper front side of the spout opening of the storage bin as detailed on the following photos after have drilled three holes as per attached drawing.
