SERVICE BULLETIN – 02/ OCTOBER 2003

SD 80 - SD 125 - SD 210

NEW CURTAIN FLAP

Starting from the following serial numbers:

SD 80 s/n 554881

SD 125 s/n 952498

SD 210 s/n 090972

The previous curtain flap has been replaced with a new one, as shown at the bottom photo

The difference consists in two small projections in the bottom part of the flap to avoid that the same can stick to the front of the evaporator when ice cubes are defrosted.

The new curtain and curtain flap are perfectly exchangeable with the previous ones and are available under the same part numbers.
