SERVICE BULLETIN - FEBRUARY '00

SP 255 / R80 - NEW 22' WIDE VERSIONS (560mm)

Starting from the serial number 1483 the model SP255 has been modified in its cabinet and unit frame from 21'' (530mm) to 22'' (560mm) so to better accomplish with the measures requested by the market.

The new SP255 version and the new models SP125, SV130 all standardised at 22'', have required also the modification in the wide size of its companion storage bin R80.

The brochures and the new price lists effective 1st April 2000 have been updated with the new versions.

The part numbers of the new components of the unit frame and cabinet (not exchangeable with the previous ones) are:

SP255

- Front/top panel	p/n	721747 09R
- Side/rear panel	p/n	721746 02R
- Unit base	p/n	781420 00R
- Front bracket	p/n	705213 00

All other components of the machine (electrical, mechanical, etc.) are unchanged.

The new SP255 are identified in the code number by the letter "F" that replace the letter "E" like shown in the following example: SP 255 ASF 06SM.

R 80

The new 22'' wide R80 storage bin is identified by the number 22 on the carton box (the code number is the same of the former one).

All spare parts of the R80 are unchanged except the bin door Frame new p/n CM 81460342, while bin Door assy, Hinges, Gaskets, Fittings, Legs, ex. are exactly the same.

Pay attention on the next few weeks/months to combine the right R80 with the SP255.

Both must be 22'' wide
